Paid Internship Opportunities

Supported by Noyce and OSUTeach, you can receive a paid internship and the opportunity to gain education experience in one of many available locations, such as zoos, aquariums, museums, or in public school settings.

The pay rate varies by internship, with a maximum of 25 hours per week for 2-8 weeks.

Internships are exclusively for students majoring in biological science, chemistry, geology, mathematics, physics, and declared OSUTeach majors.
